PATENT NO. 6214800

PATENT NO. 6214800

GENERAL INFORMATION:

APPLICANT: Krieg, Arthur M.

APPLICANT: Schwartz, David A.

TITLE OF INVENTION: USE OF NUCLEIC ACIDS CONTAINING

TITLE OF INVENTION: UNMETHYLATED CPG DINUCLEOTIDE IN

TITLE OF INVENTION: LPS-ASSOCIATED DISORDERS

TO DEFERENCE: C1039/7011

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       OTHER INFORMATION: Mutations in trypsinogen are associated with OTHER INFORMATION: phenotype of recurrent acute pancreatitis, clother information: increased risk for pancreatic cancer.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                LOCATION: GENBANK LOCUS U66061

IDENTIFICATION METHOD: Comparison of DNA sequences and/or restriction

IDENTIFICATION METHOD: enzyme digestion patterns of experimentally determined fr

IDENTIFICATION METHOD: reaction of genomic DNA from patients with hereditary pan

IDENTIFICATION METHOD: sequence in GenBank locus U66061.
